

Babylon Telecommunications, Inc. (BABTEL) partners with NEXTIT & Systems in UAE

ISP for military contractors and NGO's in conflict areas assigns contract with UAE oil-sector Software Company for infrastructure support.

Dubai, UAE (PRWEB)

Chris Catranis, CEO of Babylon Telecommunications, Inc. (BABTEL), announced today that he's signed an initial two-year contract with NEXT IT & Systems, LLC (NEXT) for infrastructure support at planned sites in the UAE. "Cost effective Managed Network Services over reliable cloud managed devices are finally here. Partnering with NEXT for on-the-ground technical support at our existing customer sites is only a logical starting point for BABTEL and NEXT. More importantly, I see NEXT as an entrée for BABTEL into deploying our Micro-ISP model at new sites across the Region's oil sector. Leveraging NEXT's unique range of software solutions over BABTEL's 100% cloud managed network architecture for providing reliable program management, morale Internet, and unified communications to oil sector man-camps, is the end-game for us," said Catranis.

For the past decade, BABTEL has provided Internet based Data, VoIP, IPTV and Unified Communications to thousands of contractors and troops living at man-camp on military bases and diplomatic missions in remote conflict and post-conflict locations. According to Shaik Hamden, CEO of NEXT, "BABTEL's unique infrastructure design, cloud based architecture and network management tools for small man-camps are in demand from our oil sector clients. I see BABTEL as the most sensible infrastructure solution over which we can launch our customized software services to our clients. It's a perfect match!"

Babylon Telecommunications, Inc. (BABTEL) is a leading US provider of ISP services to contractors and NGOs requiring rapidly deployable and reliable data, IPTV, VoIP and Unified Communications services at remote locations in conflict and post-conflict areas.

NEXTIT & Systems, LLC (NEXT) is an Abu Dhabi based turnkey software consultancy and solutions Implementation Company, focused on the serving the UAE oil sector, with development and labs and human resources outsourcing services in India.
